

## ***adsept*<sup>TM</sup> Cross Flow Technology**

### **High Performance Process Chromatography**

Natrix Separation's patented technology combines the high resolution and binding capacity typical of chromatographic resins with the speed and ease of use of membranes.

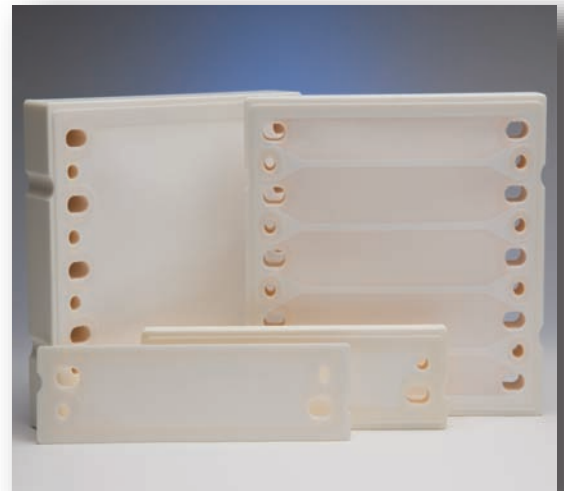

***adsept*<sup>TM</sup>** Cross Flow Technology combines the highest binding capacity and throughput chromatography membrane in an easy to use tangential flow device format.

#### **Markets and Opportunities**

- Biopharm Protein Purification
- Vaccine Production
- Food, Beverage, Dairy and Nutraceutical
- Consumer, Ultrapure and Waste Water

#### **Applications and Benefits**

- High solids or viscosity feed streams
- Viral clearance and endotoxin removal
- Protein fractionation
- High value protein and precious metal recovery from waste streams
- Heavy metal and salt removal
